

I am an adaptable individual with a passion for learning new things and embracing challenges. I thrive in team environments, whether as a leader or a supportive team member. My interests lie in web development, front-end engineering, UI/UX design, graphic design, data presentation, and all activities involving visualization. I am eager to leverage my skills and creativity to contribute effectively to any project.

Education

Universitas Gadjah Mada | Information Technology 2020 – 2024

- I have gained valuable experience in various educational roles such as being a lectures assistant, research assistant, and laboratory assistant. Engaging in competitions and participating in multiple organizations has honed my collaborative and leadership skills.
- Passionate subjects for me are : Human and Computer Interaction, User Experience, Software Development, and Decision Support Systems.
- Furthermore, my thesis focused on developing a decision support system aimed at aiding users in selecting the right skincare ingredients tailored to their specific skin type. It involves website development, artificial intelligent, chatbot integration, and many more.

Experiences

GeoAI Team Teknik Geodesi FT UGM | Junior IT Engineer Nov 2024 – Now

My Senior and I build a Digital Twin App Web based as a Geographic Information System (GIS). Collaborating with Geographic Specialist and Lecturer developing digital twin for local area in Surabaya. I handled back-end side to manage database. We used mongoDB as a data storage. It's an easy way to connect the API with Next.js App.

Freelance | IT Engineer Dec 2023 – Apr 2024

- I have experienced as frontend developer using React.js with Tailwind CSS, I have delved into creating interactive user interfaces and optimizing website performance. This position has provided me with a deeper understanding of JavaScript programming and frontend frameworks. Through this experience, I have learned the importance of attention to detail and responsiveness in web design
- In the next project, my role as a WordPress engineer, I have honed my skills in building visually appealing and functional websites using Elementor. Additionally, I have gained expertise in customizing WordPress websites to meet specific client needs, enhancing my problem-solving abilities.
- As a UI/UX designer proficient in Figma, I have delved into user-centered design principles and creating seamless user experiences. This role has allowed me to explore prototyping and user testing, emphasizing the significance of user feedback in refining design iterations. By staying updated on design trends and user behavior analysis, I continuously enhance my creative problem-solving skills in crafting intuitive interfaces.

KHDTK Wanagama | Wordpress Engineer Intern Nov 2022 – Jan 2023

- During my internship at KHDTK Wanagama, the UGM-owned forest reserve, I served as a WordPress manager, where I undertook the task of redesigning an existing website. This experience allowed me to enhance my skills in website revamping, user experience enhancement, and content organization.
- Integrating a Geographic Information System (GIS) page using Leaflet.js, a dynamic component to the website, enriching user interaction and engagement. This project not only expanded my technical capabilities but also emphasized the importance of user-friendly interfaces in conveying complex information effectively.

Phi Apple | Project Manager and CFO Nov 2021 – Jul 2023

A start-up that my friends and I built in our first year. This software house is an IT provider for all kind of type website, mobile, and IoT as client request's. I took participant as project manager, sometimes double as UI/UX Designer and Frontend Engineer. I learned how to manage people and limited time we had to full fill clients need.

DTS Pro Academy by KOMINFO | Helpdesk Jul 2021 – Sep 2022

During my time at Digital Talent Scholarship Professional Academy conducted by Ministry of Communications and Informatics, I worked as a helpdesk on the program in collaboration with Cisco Network Academy, particularly the Python class. I was managing the Cisco Course and assisting the teacher in class organization. I gained valuable insights by observing the participants' Python projects.

Fitin Indonesia | Creative Team Nov 2020 – Dec 2022

In this company, I learned to create a social and environment oriented. Fitin Indonesia produced eco-friendly product due to join #saveourplanet. Also the added value is supporting student with disabilities in SLB Yappenas. Collaborating to modify Batik Ciprat by SLB Yappenas into creative souvenirs. I was responsible for constructing new idea to engage market targeted. Started by brain storming with the team, made a plan for the marketing, and execute the idea to evolve attractiveness of Fitin Indonesia. This project managed to attract attention from PMW UGM and KBMI. We received financial assistance in the amount of IDR22.000.000 to support development of our business.
