

# Organizations

## Satu Surga | Initiator, Manager, and Media Social *Apr 2021 – Apr 2024*

As an initiator and social media organizer for annual charity volunteering initiatives, we named "Satu Surga", I had the gratifying experience of starting with a small group of friends and expanding our reach to over 70+ dedicated participants. Our efforts involved visiting various locations such as orphanages, TPST Piyungan, and waste pickers, offering assistance to those who need. All reports can be accessed in [bit.ly/SatuSurga](https://bit.ly/SatuSurga).

## KMTETI | Treasurer *Dec 2020 – Dec 2022*

During my tenure as the vice treasurer in the first year and subsequently as the main treasurer in the second year of my organization, I honed my skills in communication, teamwork, and financial management. Collaborating closely with other members, I effectively handled financial responsibilities, ensuring transparency and accountability in all transactions. These roles also reinforced the significance of clear communication and seamless teamwork in achieving shared goals.

## FIND IT 2021 and 2022 | Public Relation and Publication *Aug 2020 – Aug 2022*

Starting as a staff member in the first year, I had the opportunity to learn from my coordinator how to effectively lead a team. This experience helped me develop my understanding of leadership and teamwork. Building upon that experience, I took on the role of coordinator in the following year, where I focused on evaluating and leading my team. Through this process, I honed my leadership skills and learned how to guide a team towards success.

# Achievement

## 1st Place Winner SDGs Pitch Project Competition | International *Nov 2023*

Alongside my team, we presented our project "Inside Out You", a website designed for tracking students' mental health. This competition took place at the International Islamic University Malaysia and provided me with valuable experience in project presentation and global collaboration.

## 1st Place Winner Web Development Competition Informatics Festival 2023 | National *Oct 2023*

My team and I developed "StockMaster," a website focused on learning stock patterns and trends. This victory at a national level competition enhanced my skills in web development and strategic planning.

## Awardee Rumah Kepemimpinan Scholarship | National *Aug 2022 – May 2024*

Successfully competing against 3000+ applicants, I earned a scholarship for the 2-years incubator program at Rumah Kepemimpinan. This opportunity allowed me to grow in leadership, self-development, and effective habit-building for post-campus life. Additionally, networking with peers from diverse universities broadened my perspectives and connections.

## 1st Place Winner IT Competition Informatics Festival 2022 | National *Oct 2022*

My team excelled in building "Tutur," a website for learning American Sign Language with the aid of machine learning technology. This experience deepened my understanding of accessibility and innovation in technology projects.

## Finalist of Pekan Ilmiah Nasional (PIMNAS) 2021 | National *Sep 2022*

Recognized as a finalist in this prestigious competition by Ministry of Education, Culture, Research, and Technology, my team received a grant of IDR9.000.000 for our project "Boneka Fauna Nusantara." Leveraging Augmented Reality for teaching rare Indonesian fauna, I also developed a supporting website. This experience broadened my skills in both AR development and website creation for educational purposes.

# Recent Projects

## SkinTrack | Software Developer *Jan 2024 – Jun 2024*

My thesis project I did myself all the process. Under my lecturer's guidance, we discussed about clinical problem and how the decision support system can solve it. After deciding the topic, I researched about the phenomenal how people choose their skincare, where it should be based on their own skin type. Reviewed the previous solution and tried to improve the impact. Website that integrated with AI could be perfect combination. I designed the interface and experienced, built the frontend, integrated with the third party for efficiency reasons, and tested to public. After processed the data using SUS and UEQ tools, SkinTrack got 73,54 points and categorized as "Good" for its first released.

## StockMaster | Creator and UI/UX Designer *Sep 2023 – Oct 2023*

StockMaster is a platform where people can study about stock pattern and their updates. This project is a web based software. My team and I built this project in order to join website development competition in national level. We achieved the 1st place after presenting our project in final session. I learned how to manage our resources in a limit time for an optimal result.

## CrackCheck | Frontend Engineer and UI/UX Designer *Oct 2023 – Nov 2023*

As the Frontend Engineer and UI Designer for this project, I played a crucial role in developing its user-friendly interface and implementing advanced WebGIS functionality using the Leaflet library. The application features an interactive map visualizing road damage across Indonesia, capabilities for recording and uploading road videos, detailed AI-driven damage detection results, and downloadable road inspection reports. This project highlights my expertise in creating intuitive user interfaces and developing sophisticated web applications with geospatial features, demonstrating my ability to contribute to cutting-edge technology solutions in the field of infrastructure management.

## Tutur | Creator and UI/UX Designer *Sep 2022 – Oct 2022*

The app was developed using the Scrum method, which is commonly used for complex product development within short timelines. My team and I won the 1st Place National IT Competition Informatics Festival in 2022. I learned how to make a complete UI design for responsive web-app and work with team to create an impactful innovation.

## ASL Handy | Project Manager and UI/UX Designer *Sep 2022 – Oct 2022*

As Project Manager and UI/UX Designer for ASL Handy, I led the development of an innovative solution to bridge communication gaps between deaf individuals and the general public. Our efforts were recognized with a 2nd place win at the Summer School program hosted by Electrical and Information Engineering department, Gadjah Mada University. This project showcases my ability to manage complex initiatives and design user-centric interfaces that address real-world accessibility challenges, demonstrating my skills in both project leadership and user experience design.
